PROFILE

Business Economics graduate from the University of the Punjab, now studying for an MPhil in Economics. Experience in banking as a trainee at Meezan Bank, and international exposure in financial security, economic development and entrepreneurship. Represented Pakistan twice in Russia: at the International Olympiad on Financial Security in 2025 and at the International Festival of Youth in 2026. Author of an independent working paper on inflation and the profitability of 441 listed firms in Pakistan. Interested in financial inclusion and practical solutions to economic and social challenges.

EDUCATION

MPhil Economics *Sep 2026 – present*
University of the Punjab, Lahore

BS Business Economics *Dec 2021 – May 2026*
University of the Punjab, Lahore

- CGPA 3.29/4.00
- Coursework: Econometrics I & II, Statistics, Calculus I & II, Quantitative Decision Science, Data Visualization, Islamic Banking & Finance

EXPERIENCE

Banking Trainee *Jun – Sep 2026*
Meezan Bank, Lahore

- Gained practical exposure to banking operations and workplace procedures.
- Assisted with routine operational and documentation tasks.
- Developed an understanding of customer service, compliance and internal processes.
- Strengthened communication, teamwork and analytical skills.

RESEARCH

Inflation and Corporate Profitability in Pakistan, FY2006–FY2025 *May 2025 – 2026*
Independent working paper, not peer reviewed

- Began in 2025 as a Stata regression study of inflation and firm-level profitability; rebuilt in Python in 2026 as a twenty-year panel of 6,683 firm-years for 441 listed non-financial companies, from State Bank of Pakistan data.
- Estimated fixed-effects, threshold and sector models with Driscoll–Kraay errors and a wild cluster bootstrap: the link is weak on average, bends at about 10% inflation and differs by sector.
- Showed that operating profit grew 6.4 times in rupees but ended about 3% lower after inflation. Wrote a 21-page paper, a two-page summary and slides.

HONOURS AND AWARDS

Diploma (II degree) in Economics *Oct 2025*
International Olympiad on Financial Security, Siberian Federal University, Krasnoyarsk, Russia

- Represented Pakistan in an international competition on financial security.
- Solved case studies on anti-money laundering, counter-terrorist financing, financial compliance and economic risk.
- Gained a broader view of international financial security and cross-border cooperation.

View diploma

CONFERENCES AND PROGRAMMES

International Festival of Youth 2026 *Sep 2026*
Ekaterinburg, Russia · Entrepreneurship Track

- Presented "Financial Fraud in Pakistan and Losses to GDP" and represented Pakistan in the Interactive International Discussion on financial fraud.
- Took part in discussions on financial security, entrepreneurship and youth engagement with participants from several continents.
- Explored Russian technology and entrepreneurship initiatives, including neurotechnology demonstrations.

View participant certificate

World Bank Group Youth Summit 2026 *Jun 2026*
Washington, DC (online)

- Took part in discussions on development finance, youth economic empowerment and the future of digital jobs.

Awareness Session on SMEs and Access to Finance *Jan 2026*
State Bank of Pakistan (BSC), Lahore

- Studied credit access for small and medium enterprises, the role of financial inclusion, and the financing challenges of Pakistan's SME sector.

BRICS Arts Festival, financial security programme *Nov 2025*
Khabarovsk (online), participant

- Took part online in a programme on AML/CFT standards, FATF compliance and economic risk analysis.

Programme files

PROJECTS

Cost Optimization with Linear Programming *Aug – Oct 2026*
Independent project

- Built a multi-plant kiln-fuel linear program in R that meets heat, sulphur and supply limits and cuts the modeled FY2025 fuel bill of a listed cement producer by 4.0% (Rs 794 million a year).
- Built the dataset from company reports and published fuel data; cross-checked the optimum with GLPK and rebuilt the model in Excel Solver.
- Tested eight scenarios, including the Oct 2025 halt in Afghan coal (+5.4% cost); shadow prices show that more tyre fuel and biomass is worth more than a higher alternative-fuel cap.
